AHERA Campus Wide Survey

The AHERA Campus Wide Survey will sample visible building materials in all campus buildings and test them for containing asbestos. The results of the study will be available in a web based, updateable database that will be used for planning in renovations and maintenance operations. The information will insure that correct precautions are in place before beginning any work that will disturb asbestos.

The firm of S&ME Inc. was recommended to the Chancellor for this appointment because of the following reasons:
