ACIA

In October 1988, as a part of the elevation of ICA from Division III to Division I, the Chancellor appointed the Advisory Council on Intercollegiate Athletics (ACIA). ACIA is a committee that reports to the Chancellor on programs and practices related to ICA. The Board of Trustees, in approving the transition to Division I athletics in February 1987, defined the purpose and character of acceptable programs.

ICA programs at UNCG are intended to serve the welfare of the University community and its student-athletes. Enhancing the best interests and good reputation of both is the basic purpose of such programs.

The University has historically supported ICA. ICA provides student-athletes a special opportunity to learn through competition, to cooperate under pressure and to think strategically and tactically in pursuit of common goals. Programs that conform to fundamental educational aims and values offer benefits to campus and students. Programs that are not so oriented and administered threaten such aims and values and will not be permitted.

Working with the Chancellor to formulate policies, programs and practices in ICA that conform to the University's fundamental educational aims and values is the primary task of the Council.

Membership of ACIA consists of 15 persons appointed by the Chancellor. The Council chair is the Faculty Athletics Representative.

The Council normally meets no less frequently than every other month at a time and place chosen by the chair.

The Chancellor, the AD and the Chair of the Faculty Committee on Intercollegiate Athletics are informed in advance of Council meetings and attend such meetings.
