ACTION ITEM: Exterior Design Approval for the Student Recreation Center

BACKGROUND INFORMATION:

The University is planning the construction of a new Student Recreation Center with a budget of $91,000,000 ($6.3 million for land and $750,000 for demolition). The facility will be located on the Lee Street Corridor. At its November 11, 2010 and December 2, 2011 meetings this Board approved a facilities fee to finance the project. The facility will consist of approximately 216,000 GSF of space including gymnasium, natatorium, climbing wall, indoor jogging track, racquetball courts, fitness, instruction, support and administrative areas. This Board, at its September 15, 2011 meeting, selected the team of Walter Robbs Callahan and Pierce as the designer of record for the project with RDG as the design consultant. The design has progressed to the point that exterior design is complete enough to seek approval.

RECOMMENDED ACTION:

The Board of Trustees of the University of North Carolina at Greensboro approves the exterior design of the new Student Recreation Center.
