Discussion Item

AAC – 1  Academic Affairs Performance Metrics and Data Informed Decision Making (Dunn)

Background Information

UNCG compiles and analyzes data to inform decision making, resource allocation, and to monitor progress toward institutional goals. Data published on the Office of Institutional Research website [https://its.uncg.edu/](https://its.uncg.edu/) include information on student preparation and academic costs; enrollment, graduation and retention rates; and students studying abroad. These data are also presented in comparison to a set of peer institutions. Information on faculty instructional workload and faculty research outcomes is also available. In addition, each year UNCG administers a graduating senior survey that explores student satisfaction regarding various aspects of their UNCG experience. Finally, UNCG regularly assesses academic programs via student learning outcomes assessment.

AAC-1.1  “Real Data Revolution” (Trusteeship, July/August 2016)

AAC-1.2  Academic Affairs Performance Metrics and Data Informed Decision Making
