Discussion Item

BAC-2  Transitioning from McIver to New Nursing and STEM Building

Background Information

On February 15, 2015, the Board of Trustees voted unanimously on a resolution in support of the Connect NC bond package passed on March 15, 2015. Part of that package afforded UNCG the opportunity to construct a new Nursing and Instructional Building.

The project includes demolition of the McIver Building and construction of a new four story facility that will house the School of Nursing which is currently located in four buildings. The School of Nursing will occupy approximately 50% of the building to allow for enrollment expansion and the benefits resulting from being in one location. In addition to spaces for the School of Nursing, the facility will provide teaching and flexible laboratory research space for Biology, Chemistry and Health and Human Sciences, as well as classroom space. All components are critical in order to maximize the effectiveness of the investment by addressing immediate space needs in over-c capacity programs and leveraging opportunity for growth in enrollment in high-demand STEM and health fields. However, the demolition of the existing McIver Building offers some unique challenges to the campus.
